Subject: DOCKET NO. SDWA-10-2013-0080 / George DeRuyter & Son Dairy DRAFT Irrigation Water Management Plan

Eric, Jennifer, and Rene:

Submitted on behalf of D & A Dairy, LLC (also known as D&A Dairy L.L.C.), George DeRuyter & Son Dairy, L.L.C., and George & Margaret, L.L.C., please find attached DRAFT Irrigation Water Management Plan (IWMP) for George DeRuyter & Son Dairy WITHOUT individual field figures. This document is prepared in response to EPA's comment letter dated November 7, 2013. Also included is a letter providing specific response to EPA's comments.

During a final quality review yesterday, it was found that the topographic contour lines plotted on the field-specific figures (as requested in the comment letter) were inaccurate. ARCADIS found that the GIS method used to convert the Digital Elevation Model elevation data was in error. We attempted to correct the issue this morning, but have determined that a significant amount of processing time is needed to convert the data into a renderable format. This is an ARCADIS issue and we take full responsibility for the delay in providing a complete report; however, in the interest of demonstrating a substantial amount of compliance with the deadline of November 20, 2013 for the IWMP, we are providing the report without the individual figures. We will provide the figures as soon as possible, likely late today or early tomorrow, as a separate PDF file.

A MS Word 97/2003 compatible version of the report text for your editing purposes is attached to this e-mail. A complete hard copy will be provided via Federal Express as soon as one is produced. Please let me know if you have difficulty opening the attachments. Thank you.
